### ALSO CONTAINS NON PLANT FOOD INGREDIENT(S):

2.5% Humic Acids derived from Leonardite

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

F002174

### APPLICATION RATES

**2.5 cups ≈ 1 lb; ½ cup ≈ 3.2 oz; 1 tbsp ≈ 0.4 oz**

**Tomatoes:** For new 4" tomato starts, prepare transplant holes and mix 2-3 tbsp with the backfill soil for each plant. Use amended soil to fill in around the new plant and water in well. For 1 gallon tomato transplants, use ¼-½ cup per plant. To feed established tomatoes, side dress ¼-½ cup per plant, depending on plant size and desired growth rate, once each month during the growing season.

**Vegetable Gardens:** To prepare new gardens, apply ½ cup per square foot and thoroughly mix into the top 3" of soil. For new transplants, add 1-2 tbsp per hole, mix into soil and water in well. To feed established plants, side dress 2-4 tbsp per plant, depending on plant size and desired growth rate, twice each month during the growing season.

**Outdoor Containers:** For new plantings, add 2 tbsp per gallon of soil and mix thoroughly. To feed established plants, lightly mix 1-2 tbsp per gallon into the soil surface twice each month during the growing season.
