APPLICATION RATES

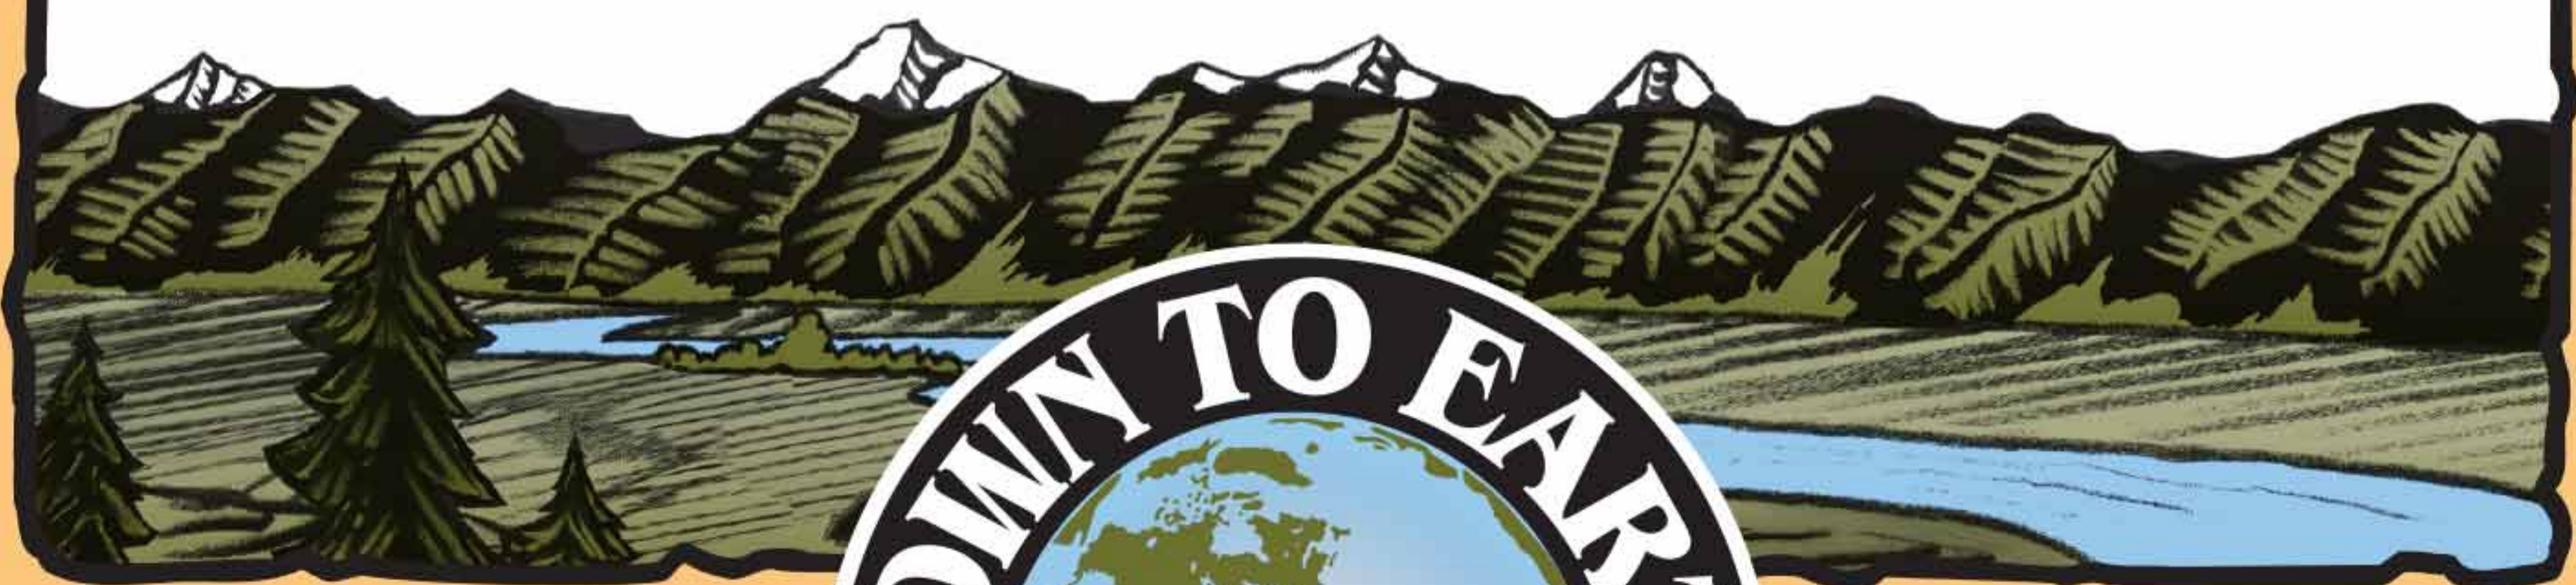

2 ½ cups ≈ 1 lb; ½ cup ≈ 3.2 oz; 2 ½ tbsp ≈ 1 oz

Bulbs: When planting, add 2-4 tablespoons per hole, mix into soil and water in well.

Roses & Perennials: For new transplants, add ½-1 cup per hole, mix into soil and water in well. To feed established plants, side dress ¼-½ cup per plant, depending on plant size and desired growth rate, once each month during the growing season.

Vegetable Gardens & Flower Beds: To prepare new gardens, apply 3-6 lbs per 100 square feet and thoroughly mix into the top 3" of soil. For new transplants, add 1-2 tbsp per hole, mix into soil and water in well. To feed established plants, side dress 2-4 tbsp per plant, depending on plant size and desired growth rate, twice each month during the growing season.

Containers: For new plantings, add 2 tbsp per gallon of soil and mix thoroughly **OR** add 5-10 lbs per cubic yard. For established plants, lightly mix 1-2 tbsp per gallon into the soil surface twice each month during the growing season.

ALL NATURAL FERTILIZERS

Use of a dust mask is recommended for application of any dry fertilizer product.
